

Emissions

**Do you need to analyze
emissions strategy?**

Emissions

Do you need to assess the future of emissions prices? Emissions planning is becoming an urgent issue in North America. The payoff for making the right choices in this new era of planning will be large. The risk of delaying or neglecting analysis of emissions is high.

But emissions planning is a new frontier. Analysts in most companies lack the tools to adequately analyze this issue. MarketPoint provides a complete emissions modeling system that can answer your emissions questions today.

MarketPoint was established in 1996 to create a general purpose software platform for energy modeling. Our software is used internationally for strategy and operations decisions in the energy and chemical industries. The software uses economic analysis techniques and industry data to forecast prices based on fundamentals. We provide the software, data, training and support to enable your staff to model future markets. Contact us and ask to see our demonstration of emissions forecasting methods.
